

Finding the Model Number on Your Sleeper Sofa Mechanism

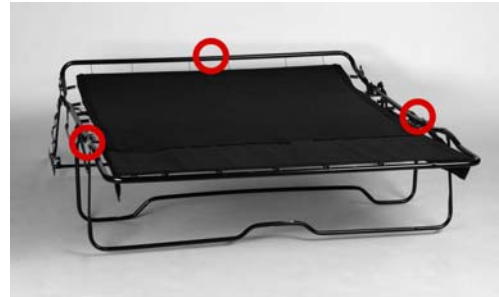

If you are replacing an existing sleeper sofa mechanism, or you are purchasing a fabric deck repair kit for your sleeper sofa mechanism, obtaining the manufacturer and model number of your current mechanism is critical to ensuring you receive the correct product. This is the only reliable way to match parts, since many models of mechanism can be very similar, but not exactly the same, in appearance and dimensions.

Using the information below, you should be able to locate the model number sticker for your mechanism. The two most common manufacturers of Sleeper Sofa Mechanisms are Leggett & Platt or Hickory Springs. Keep in mind that this will be different than the company who made your sofa (Ashley, Broyhill, Simmons, La-Z-Boy, etc.)

Common Locations to Find a Model Number:

In almost all cases, the manufacturer's name and model number will be printed on a sticker applied directly to the metal frame. Most mechanisms will have multiple stickers, since they may get rubbed and wear down with use.

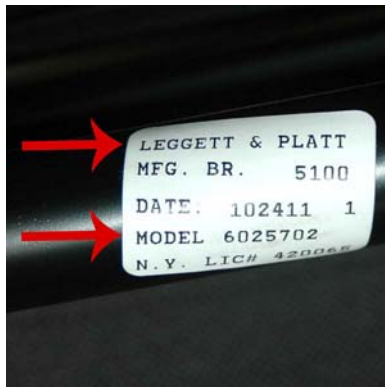

Common locations are circled in the image to the right.

Information on the Sticker:

The model number sticker will contain a variety of information, and may appear in several different formats. Two pictures showing typical Leggett & Platt stickers are below, although Hickory Springs and other manufacturers will have similar stickers.

The two pieces of information you're looking for here are the manufacturer's name and the size or model number. This is the information you will need to match the correct mechanism or repair kit online, and this is the first piece of information you will be asked for if you place an order on the phone.

If you need assistance determining the manufacturer or model number of your current mechanism, or you have found it and now need help picking the correct product, don't hesitate to contact us for support.
